# Ultracamp Conditional/Logic Questions

1. **Restricting Age/Grade based questions with My Forms**

   Go to Settings – System/Management – My Forms
   - When creating/editing a form, go to Basic Information
   - Scroll to Restrictions – Choose what ages or grades are supposed to get this form
   - Continue creating the form and adding the questions that would be required for that age you restricted it to.
   - When scheduling this session, you can require this form during registration or outside of it.
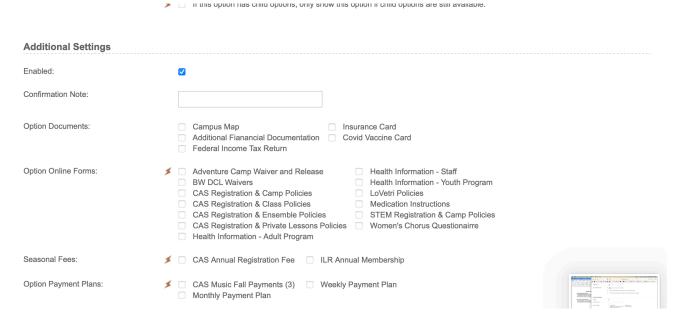

Example Scenarios/Questions to use with this choice:
- Questions you want to only ask individuals who are school aged (5-18)
- Questions just for middle school or high school aged
- Questions to just ask adults

2. **Use Options as Preliminary Question to then require a Form**
   Go to Settings – Options – Options Templates
   - When creating/editing an option, go to Additional Settings towards the bottom
   - Choose what Documents or Forms would be required for that specific option chosen
   - Once it is checked in the template, it should trigger the form once the option is selected.
   - This won't work if you have option category showing up all at once at the end of all sessions. It only works if the option category shares a page with other categories or is showing on it's own page. (This is something to setup under Option Categories)

   Example Questions to use with this choice:
   - Is the participant commuting or staying on campus?
     - Child Options: Gender Expansive Housing, Female Specific, Male Specific
   - Do you live in Lorain County? – Then require a form for those who say yes.

3. **Membership**
   Limited that it can only ask/answer 1 question.
   It will be asked for every single session you add membership to.
